

## Sodium Benzoate

Granular NF / FCC Grade / BP2015 / USP38

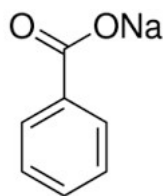

Sodium Benzoate is primarily used as FDA GRAS additive and preservative in food and beverage applications to reduce or inhibit activity of microorganisms. It is also used in a wide range of other applications such as pharmaceuticals, toiletries, adhesives, pastes, polishes, cleaners, and emulsions.

CAS NO.: 532-32-1

Molecular Formula: C<sub>7</sub>H<sub>5</sub>O<sub>2</sub>Na

Molecular Weight: 144

Molecular Structure Formula:

### Typical Properties:

Appearance	White granular
Assay	≥ 99.0%
Moisture	≤ 1.5%
Solubility (in Water)	Easily soluble
Storage	Store cool and dry

### Shipping Information:

Packing Group:  
Hazard class: Not regulated  
Packaging: 25 kg bags

### Contact Information:

**Customer Service: 1-877-847-8351**
