

Sodium Benzoate

Granular NF / FCC Grade / BP2015 / USP38

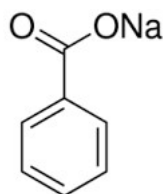

Sodium Benzoate is primarily used as FDA GRAS additive and preservative in food and beverage applications to reduce or inhibit activity of microorganisms. It is also used in a wide range of other applications such as pharmaceuticals, toiletries, adhesives, pastes, polishes, cleaners, and emulsions.

CAS NO.: 532-32-1

Molecular Formula: C₇H₅O₂Na

Molecular Weight: 144

Molecular Structure Formula:

Typical Properties:

| Appearance | White powder |
|-----------------------|--------------------|
| Assay | ≥ 99.0% |
| Moisture | ≤ 1.5% |
| Solubility (in Water) | Easily soluble |
| Storage | Store cool and dry |

Shipping Information:

Packing Group:
Hazard class: Not regulated
Packaging: 25 kg bags
