SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name: Chlorendic Anhydride PE1+
REACH registration No.: 01-2119911956-30-0000
CAS-Number: 115-27-5
EC-number: 204-077-3
EU-number: 607-101-00-4

1.2 Relevant identified uses of the substance or mixture and uses advised against

1.2.1 Relevant identified uses:

Industrial applications: Hardener for epoxy resins, paints, and coatings.
Other non-specified industry: Flame retardant in unsaturated polyester resins.

1. Receipt and storage of raw materials
   SU 10; PROC 1, 3, 8b; PC 32; ERC 2
2. Blending or dissolving or dispersion
   SU 10; PROC 2, 4, 5; PC 32; AC 32; ERC 2
3. Filtering and filling
   SU 10; PROC 8a, 9; PC 32; ERC 2
4. Waste management
   SU 23; PROC 3, 8b; ERC 2
5. Use in closed batch process (synthesis or formulation)
   SU 3; PROC 3; PC 32; ERC 2
6. Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)
   SU 3; PROC 5; PC 32
7. Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities
   PROC 8b, 9; PC 32; ERC 2
8. Research and development
   PROC 15; PC 32; ERC 2

1.2.2 Uses advised against:

No specific uses advised against have been identified.

1.3 Details of the supplier of the safety data sheet

Company name: Velsicol Chemical Ireland Ltd
Charter House
5 Pembroke Row
Dublin 2
Republic of Ireland
WWW: www.velsicol.com
E-mail: sfriedman@velsicol.com
Telephone: 00353 1 477 3143
Telefax: 00353 1 402 9587
Dept. responsible for information: sfriedman@velsicol.com

1.4 Emergency telephone number

Telephone: +49 51 92 98970 (08:00– 17:00 CET) or
CHEMTREC, Telephone: +1 703 527 3887 (24h; from USA: 1-800-424-9300)
SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to EC regulation 1272/2008 (CLP)

Skin Irrit. 2; H315 Causes skin irritation.
Eye Irrit. 2; H319 Causes serious eye irritation.
Skin Sens. 1; H317 May cause an allergic skin reaction.
Carc. 2; H351 Suspected of causing cancer.
STOT SE 3; H335 May cause respiratory irritation.
Chron. 3; H412 Harmful to aquatic life with long lasting effects.

2.2 Label elements

Labelling (CLP)

Signal word: Warning

Hazard statements:

H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
H319 Causes serious eye irritation.
H335 May cause respiratory irritation.
H351 Suspected of causing cancer.
H412 Harmful to aquatic life with long lasting effects.

Safety precautions:

P201 Obtain special instructions before use.
P260 Do not breathe dust.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
P309+P311 IF exposed or if you feel unwell: Call a POISON CENTER or doctor/physician.
P403+P233 Store in a well-ventilated place. Keep container tightly closed.

Special labelling

To avoid risks to human health and the environment, comply with the instructions for use.

2.3 Other hazards

No risks worthy of mention.

SECTION 3: Composition / information on ingredients

3.1 Substances

Chemical characterization: C9 H2 Cl6 O3
Chemical name: 1,4,5,6,7,7-Hexachlorobicyclo [2,2,1]hept-5-ene-2,3-dicarboxylic anhydride
CAS-Number: 115-27-5
EC-number: 204-077-3
EU-number: 607-101-00-4
Purity: >95%
Hazardous impurities

3.2. Mixtures
No a mixture

SECTION 4: First aid measures

4.1 Description of first aid measures

4.1.1 General information:
Inhalation and skin contact are expected to be the primary routes of occupational exposure to chlorendic anhydride. This material is irritating to the eyes, skin and respiratory tract.

4.1.2 Following inhalation:
Remove to under fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

4.1.3 Following skin contact:
Immediately wash skin with soap and plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Destroy contaminated shoes.

4.1.4 Following eye contact:
Immediately flush with plenty of water for at least 15 minutes. Get medical attention immediately.

4.1.5 Following ingestion:
Inducing vomiting as directed by medical personnel. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.

4.1.6 Self-protection of the first aider:
Wear protective gloves/protective clothing/eye protection/face protection. Do not get in eyes, on skin, or on clothing. Contaminated work clothing should not be allowed out of the workplace. Get medical attention immediately.

4.1.7 Notes for the doctor:
Not available.

4.2 Most important symptoms and effects, both acute and delayed
Severely irritate to eyes. May cause damage to lungs, stomach, heart and liver through prolonged or repeated exposure to oral, dermal and inhalation. Suspected of causing cancer though oral exposure.

4.3 Indication of any immediate medical attention and special treatment needed
Treat symptomatically

SECTION 5: Firefighting measures

5.1 Extinguishing media
- Flammability Properties: Non-flammable.
- Suitable extinguishing media: Extinguishing is to be in accordance with the surrounding fire.
- Unsuitable extinguishing media: Not applicable.

5.2 Special hazards arising from the substance or mixture
Fine dust.
This product contains up to 5% occluded Chlorobenzene, which can present a fire hazard if sufficient oxygen and a source of ignition is present.

5.3 Advice for firefighters
- Special protective equipment for firefighters:
Advice for fire-fighters: Wear self-contained breathing apparatus, protective clothing and rubber boots.

- Additional information:
  
  Non-flammable; No explosion
  Do not allow fire water to penetrate into surface or ground water.

**SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

Use suitable personal protective equipment to protect skin and eyes. Ventilate affected area. Avoid generation of dust.

6.2 Environmental precautions

Do not allow to enter into ground-water, surface water or drains.
In case of entry into waterways, soil or drains, inform the responsible authorities.

6.3 Methods and material for containment and cleaning up

Stop leak if safe to do so.
Collect in closed and suitable containers for disposal. Dispose of this material and its container to hazardous or special waste collection point.
Avoid generation of dust.
Remove residual product with water and detergent.

6.4 Reference to other sections

Refer additionally to chapter 8 and 13.

**SECTION 7: Handling and storage**

7.1 Precautions for safe handling

7.1.1 Recommendations for safe handling

- Protective measures: Do not handle until all safety precautions have been read and understood.
  Wear suitable protective clothing, gloves and eye/face protection.
- Protective measures at Dust formation: Provide good ventilation. Do not breathe dust/fume/gas/mist/vapours/spray.
- Environmental measures: Avoid release to the environment.

7.1.2 Advices on general occupational hygiene

Avoid contact with skin and eyes. Change contaminated clothing. When using do not eat, drink or smoke. Wash hands before breaks and after work.

7.2 Conditions for safe storage, including any incompatibilities

7.2.1 Requirements for storerooms and containers

Store at room temperature in a dry and well ventilated area. Keep container tightly closed. Keep away from food, drink and animal feeding stuffs.

This product contains up to 5% occluded Chlorobenzene, which can present a fire hazard if sufficient oxygen and a source of ignition is present. Ground containers and equipment to avoid static charge accumulation and/or use an inert atmosphere to prevent combustion.

7.2.2 Storage Class

Protect from humidity and water.

7.3 Specific end use(s)

<table>

### SECTION 8: Exposure controls/personal protection

#### 8.1 Control parameters

##### 8.1.1 The national occupational exposure limit values

**Chlorendic Anhydride:**
contains no occupational exposure limit values.

**Chlorobenzene:**
Exposure Limits: TWA: 10 (ppm) or 46 (mg/m³).

**Maleic anhydride:**
United Kingdom, WEL - TWA: 1 mg/m³ TWA, WEL - STEL: 3 mg/m³ STEL
United States: TWA: 0.25 ppm from OSHA/NIOSH; TWA: 0.25 ppm from ACGIH.

##### 8.1.2 Recommended monitoring procedures

DN(M)EL: Derived No(Minimal) Effect Level; NOAEL(C): No-observed-adverse-effect level (concentration), PNEC: Predicted No-Effect Concentration; AF: Assessment Factor

8.2 Exposure controls

8.2.1 Appropriate engineering controls:
Provide ventilation if necessary to minimize exposure. If practical use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

8.2.2 Personal protective measures:
Do not eat, drink, or smoke whilst working. Keep away from foodstuffs, beverages and feed. Remove all contaminated clothing. Wash hands before breaks and at the end of work.

Respiratory protection
A full-face piece respirator with dual organic vapour and particulate matter cartridge is recommended.

Hand Protection
Chemical resistant coveralls, gloves and boot covers. If gloves are damaged during use, remove immediately and wash hands before replacing with new gloves.

Eye and face protection
Safety glasses should be worn when handling this substance.

Skin protection
Aprons or coveralls are recommended. These should be changed after use or if contaminated. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

8.2.3 Environmental exposure controls:
Avoid release to the environment.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance: Physical state: Solid, Crystalline
Colour: White
Odour: Strong odour of aromatic hydrocarbons
Odour threshold: Unknown
pH: Not available
Boiling point/range: 266.5 - 322 °C
Melting point/ range: 235 - 239 °C
Flash point: Not applicable
Flammability: Non-flammable
Autoflammability: Use as flame retardant.
Explosive properties: Not explosive
Vapour pressure: at 25 °C: 0.00268 Pa
Vapour density: no data available
Density: at 20 °C: 1.76 g/cm³ (Pyknometer)
Solubility: Easily soluble in: Acetone; Soluble in: Methanol, diethyl ether, n-octanol
Water solubility: at 20 °C: ≤ 0.0025 g/L
Partition coefficient n-octanol/water: at 20 °C: 1.76 log Kow (Chlorendic acid)
Appreciable bio-accumulation is not to be expected (log Po/w 1-3).
Auto-ignition temperature: use as flame retardant.
Thermal decomposition: no data available
Viscosity, dynamic: no data available
Viscosity, kinematic: not applicable
Explosive properties: no data available
Oxidizing characteristics: no data available
Dissociation Constant: Study not undertaken as Chlorendic Anhydride readily hydrolyses

9.2 Other information
Molecular weight: approx. 371 g/mol
Particle size distribution (median value):
0.1% w/w < 10 µm
Evaporation rate: Not applicable
Decomposition temperature: Not available
Oxidising properties: Not oxidising
Vapour density: not available
Surface tension: 72 mN/m (20°C, 450 mg/L aqueous solution). The product hydrolyses quickly in the presence of water to: Chlorendic acid

SECTION 10: Stability and reactivity

10.1 Reactivity
Not a reactive substance and no reactive hazards are expected.
No hazardous reaction when handled and stored according to provisions.

10.2 Chemical stability
Product is stable under normal storage conditions.
The product hydrolyses quickly in the presence of water to: Chlorendic acid

10.3 Possibility of hazardous reactions
No dangerous reactions are known.

10.4 Conditions to avoid
Protect from moisture contamination. Protect from heat and direct sunlight.

10.5 Incompatible materials
Oxidizing or reducing agents, strong bases, acids.

10.6 Hazardous decomposition products
No decomposition when used properly.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

115-27-5, Chlorendic Anhydride:
(a) Acute toxicity
This substance is not classified as acute toxic for all exposure route listed below:

<table>
<thead>
<tr>
<th>Acute Toxicity</th>
<th>Effect Dos /Concentration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acute Oral Toxicity</td>
<td>LD50: 2562 mg/kg bw (male)</td>

<td>17.3</td>
<td>no data</td>
<td>Rabbit</td>
</tr>
</tbody>
</table>

(d) **Respiratory/skin sensitisation**
May cause an allergic skin reaction

(e) **Germ cell mutagenicity**
Chlorendic Anhydride is not classified as genetically toxic as all study results are negative.

(f) **Carcinogenicity**
Suspected of causing cancer though oral exposure

Chlorendic anhydride will rapidly hydrolyse to chlorendic acid in the presence of water. The National Toxicology Program (NTP) has concluded that there is clear evidence of carcinogenicity (cancer) in a feeding study of rats and mice using chlorendic acid. International Agency for Research on Cancer (IARC) has given chlorendic acid an overall evaluation of 2B (possibly carcinogenic).

(g) **Reproductive toxicity**
Chlorendic anhydride is not classified as toxic to reproduction as negative results were obtained in the reproductive and spermatogenetic studies in animals.

**Adverse effects on sexual function and fertility:**

<table>
<thead>
<tr>
<th>Species</th>
<th>Result /Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mouse</td>
<td>NOEL (Fetal mortality): &gt; 223 mg/kg bw/day (actual dose received)</td>

<td>NOEL: 400 mg/kg bw/day (actual dose received); NOEL (maternal toxicity): 100 mg/kg bw/day (nominal)</td>
</tr>
</tbody>
</table>

(h) **STOT-single exposure**
May cause respiratory irritation

(i) **STOT-repeated exposure**
Not classified

(j) **Aspiration hazard**
This substance is a solid.

108-31-6, Maleic anhydride in RTECS (#ON3675000):
Dermal, guinea pig: LD50 = >20 gm/kg;
Draize test, rabbit, eye: 1% Severe;
Oral, mouse: LD50 = 465 mg/kg;
Oral, rabbit: LD50 = 875 mg/kg;
Oral, rat: LD50 = 400 mg/kg;  
Skin, rabbit: LD50 = 2620 mg/kg.

115-28-6, Chlorendic Acid in RTECS (#RB9000000):  
Draize test, rabbit, eye: 250 ug/24H Severe;  
Draize test, rabbit, skin: 500 mg/24H Mild.

The National Toxicology Program (NTP) has concluded that there is clear evidence of carcinogenicity (cancer) in a feeding study of rats and mice using Chlorendic acid. International Agency for Research on Cancer (IARC) has given Chlorendic acid an overall evaluation of 2B (possibly carcinogenic).

108-90-7, Chlorobenzene:  
Oral, LD50, Rat: 1110 mg/kg;  
Oral, LD50, Mouse: 2300 mg/kg.

### SECTION 12: Ecological information

#### 12.1 Toxicity

**Aquatic toxicity:** Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

- **Acute (short-term) fish toxicity:**
  - LC50 Oncorhynchus mykiss: 422.7 mg/L/96h (EU Method C.1)
  - LC50 Lepomis macrochirus (Bluegill): 422.7 mg/L/96h (EU Method C.1)
  - LC50 (freshwater fish): 422.7 mg/L

- **Acute Daphnia toxicity:**
  - EC50 Daphnia magna (Big water flea): 110.7 mg/L/48h (EU Method C.2)

- **Acute (short-term) toxicity to crustacea:**
  - EC50/LC50: 110.7 mg/L/48h

- **Algae toxicity (acute):**
  - EC50/LC50: 97.2 mg/L/72h (Algal Inhibition test)
  - EC10/LC10 or NOEC: 48.4 mg/L/72h (Algal Inhibition test)

- **Algae toxicity (chronic):**
  - EC50: >97.2mg/L

**Water Hazard Class:** 2 = hazardous to water

<table>
<thead>

#### 12.2 Persistence and degradability

- **Further details:**
  - **Abiotic degradation:**
    - Chlorendic Anhydride hydrolyzed with water (Product: Chlorendic acid).
    - Water solubility (Chlorendic acid): 0.499 mg/L.

- **Biodegradation:**
  - Chlorendic Anhydride: Not bio-degradable.
  - Chlorendic acid: Potentially biologically degradable.

#### 12.3 Bioaccumulative potential

- **Partition coefficient n-octanol/water:** 1.39 log Kow; No accumulation
- **Partition coefficient n-octanol/water:** at 20 °C: 1.76 log Kow (Chlorendic acid)

Appreciable bio-accumulation is not to be expected (log Po/w 1-3).
12.4 Mobility in soil
Chlorendic Anhydride hydrolyzed with water (Product: Chlorendic acid) log Koc = 0.92
(Chlorendic acid)

12.5 Results of PBT and vPvB assessment
This substance does not meet the PBT/vPvB criteria of REACH, annex XIII.

12.6 Other adverse effects
General information: Do not allow to penetrate into soil, waterbodies or drains.

SECTION 13: Disposal considerations

13.1 Waste treatment methods
Product
Waste key number: 07 01 99 = Wastes from the manufacture, formulation, supply and use (MFSU) of basic organic chemicals: Wastes not otherwise specified
MFSU = manufacture, formulation, supply and use
Recommendation: Ensure all waste water is collected and treated via a waste water treatment plant.
Alternative: Incinerate according to applicable local, state and federal regulations.

Contaminated packaging
Recommendation: Dispose of waste according to applicable legislation.

SECTION 14: Transport information

14.1 UN number
Not applicable

14.2 UN proper shipping name
ADR/RID, IMDG, IATA: Not restricted

14.3 Transport hazard class(es)
Not applicable

14.4 Packing group
Not applicable

14.5 Environmental hazards
Marine pollutant - IMDG: No

14.6 Special precautions for user
No dangerous good in sense of these transport regulations.

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
No data available

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
National regulations - EC member states
Labelling of packaging with <= 125mL content
Hazard statements:
H317 May cause an allergic skin reaction.
H351 Suspected of causing cancer.
H412 Harmful to aquatic life with long lasting effects.

Safety precautions:
P201 Obtain special instructions before use.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P309+P311 IF exposed or if you feel unwell: Call a POISON CENTER or octor/physician.

National regulations - USA
TSCA Inventory: listed, active
TSCA H PVC: not listed

NFPA Hazard Rating:
Health: 3 (Serious), Fire: 0 (Minimal), Reactivity: 0 (Minimal)

HMIS Version III Rating:
Health: 3 (Serious) - Chronic effects, Flammability: 0 (Minimal), Physical Hazard: 0 (Minimal)
Personal Protection: X = Consult your supervisor

15.2 Chemical Safety Assessment
For this substance a chemical safety assessment has been carried out.

SECTION 16: Other information

16.1 Indication of changes
Major update: change format on most sections. 2019-04-05
Modified Section 2 and 11: Delete H373, STOT SE 3., 2017-09-20
